EDUCATION

University Institute of Engineering and Technology, Kurukshetra

2022 – 2026

B.Tech - Computer Science and Engineering - **CGPA - 9.03**

Kurukshetra, Haryana

EXPERIENCE

Co-Initiator at etaiyari [↗](#)

July 2024 - August 2025

Role - Product Developer (Full Stack Developer)

- Developed etaiyari, a platform covering 9 major Indian exams with **400+** users and **7K** user interactions, offering exam info and a common marketplace for teachers and students.
- Built and managed multiple admin dashboards, including Student & Teacher Databases, Product Management (upload/manage), and Purchase Tracking.
- Developed modules for Buy Dashboard, Pending Approvals, Student & Teacher Purchases, and Query Management.
- Tech Stack: Flask, MySQL, Jinja2, JavaScript

PROJECTS

SkyBook (Airline Reservation System) [↗](#)

July 2025

- Built a full-stack flight booking platform using Flask and MySQL with search, booking, cancellation, and ticket download features.
- Designed database schema and constraints to allow multiple bookings per user while preventing duplicate same-day same-flight bookings.
- Developed a user dashboard for managing bookings and an admin panel with flight management, reporting, and integrated dynamic pricing based on seat availability and departure time.
- Tech Stack: Python (Flask), MySQL, HTML/CSS/JavaScript, Jinja2

Doct-i (AI HealthCare Platform) [↗](#)

Jan 2025

- Conducted EDA and preprocessing on healthcare data; applied Gradient Boosting, SVM, and Random Forest for top-7 disease predictions with probabilities.
- Built and deployed a TensorFlow-based skin disease classifier using Flask for real-time inference.
- Designed a doctor recommendation system via weighted scoring of patient-doctor parameters.
- Developed an NLP-based symptom chatbot with Dialogflow, Flask; automated BMI-based fitness reports.
- Tech Stack: Python, Pandas, NumPy, Scikit-learn, Gradient Boosting, SVM, Random Forest, Matplotlib, Seaborn, Flask, Dialogflow

Spam Email Classification using NLP [↗](#)

Dec 2024

- Preprocessed text with tokenization, stop word removal, and lemmatization using spaCy.
- Extracted features via TF-IDF, Bag of N-grams, and spaCy word embeddings.
- Trained and evaluated Naive Bayes and K-Nearest Neighbors classifiers.
- Visualized features and model performance with Matplotlib and Seaborn.
- Tech Stack: Python, spaCy, Scikit-learn, TF-IDF, N-grams, Matplotlib, Seaborn

TECHNICAL SKILLS

Languages: Python, Java, JavaScript

Technologies/Frameworks: HTML, CSS, Javascript, Flask, Jinja2

Tools & Lib: Git, GitHub, MySQL, Dialogflow, Numpy, Pandas, Scikit-learn, AWS, Matplotlib

Soft Skills: Collaboration, Teamwork, Active Listener, Time Management, Problem-Solving & Debugging, Analytical thinking, Decision Making.

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, System Design, Databases, Machine Learning, NLP

Certifications and Achievements

- Completed 6-week ML Training from Internshala
- Solved 200+ Leetcode Problems
- Actively participated in 10+ Machine Learning AI Hackathons; selected as a finalist in 6+
- Won College Level Hackathon - TechVision
- Won College Level Coding Competitions
